Animal Shaped Trash Cans

An animal shaped trash can is an ideal solution to help encourage young children to dispose of their trash correctly in both indoor & outdoor environments. The fun and colorful nature of the trash cans means that they are able to complement all areas for children.

You can also personalize our animal shaped trash cans to feature your company logo, color and message.

Cigarette Receptacles

Glasdon design and produce a range of cigarette units that can be situated in outdoor smoking areas, outside buildings, parks and sidewalks. Within our range of cigarette waste containers, there are units that can be wall mounted as well as free standing. Having a cigarette unit mounted to a wall takes up very little space making it perfect for narrow footed areas. Help to reduce the cost of cleaning up cigarette butt litter for your organization by installing a cigarette ash receptacle.

Smoking Shelters

Glasdon supplies a range of outdoor smoking shelters and canopies, which can either be wall mounted or free standing. These outdoor shelters are ideal for creating a designated smoking area to help keep the rest of your site smoke-free. These smoking shelters and canopies can be combined with our cigarette bins to create a smoking station.

Indoor Recycling Containers

We design and manufacture a wide range of indoor recycling bins. Available in a large selection of styles, materials and capacities to suit your requirements. Apertures and graphics are available for various waste streams, which allow you to manage recycling waste more effectively.

How can I best manage confidential documents?

Personal and sensitive business data is often classified as private or confidential, and should be securely processed to make sure it stays that way – but is this always the case?

What measures can your organization take to ensure confidential data stays confidential? We've compiled some tips and considerations to help you manage and dispose of private and personal documents.

FAQ - How Should I Manage Confidential Waste?

Conduct a waste audit to enable you to find the best waste management solutions for your building or premises. Your waste audit should cover:

- Areas on site where confidential waste is generated
- The quantity of this waste in each given area
- The people required to oversee the collection and disposal of your confidential documents

Once your waste audit is complete, you can then proceed to selecting the right confidential waste bin for your organization.

Key considerations include:

Security, Style, Capacity, Location

FAQ - How Can I Securely Dispose of Confidential Waste?

All confidential waste should be collected and destroyed separately from any non-confidential waste before it can be recycled. Empty your confidential shredding bins into security bags which you can securely seal prior to shredding or collection by a waste contractor.

For more information about Glasdon secure paper containers or help with your waste audit please talk to one of our specialist advisors today.

The Benefits of Battery Recycling

With technology on the rise, batteries have become a staple of everyday life. According to EPA, 2.9 billion batteries are sent to landfill in the US alone.

Batteries contain heavy metals such as lead, zinc and mercury, which are considered hazardous to the environment when improperly disposed of. That's why it's more important than ever to recycle batteries. **So, what are the benefits of recycling spent batteries?**

Reducing Waste Sent to Landfill

Despite most types of batteries being recyclable, research suggests that only 10 – 12 per cent of batteries sold annually in North America are recycled. By recycling used batteries you can help to reduce the amount of waste sent to landfill.

Preventing Pollution

Due to the heavy metal content, discharged batteries sent to landfill can corrode, releasing toxins into the air and land. These toxins can be harmful for the environment, highlighting the importance of battery recycling in order to prevent water, land and air pollution.

Conserving Natural Resources

Batteries are produced from natural resources of metal elements such as lead, lithium, nickel and other rare earth elements. Scientific research claims that recycling batteries can save a great 51.3 per cent in natural resources.

Producing New Products

Give used batteries a new lease of life by recycling them. Recycled batteries can be repurposed to create new batteries or other appliances.

Generating New Jobs

By committing to recycling you are helping to create new jobs in the recycling and manufacturing industries in the United States. Given the ability of recycling to generate jobs, responsibly recycling batteries will positively impact both the economy and the environment.

Discover our range of recycling containers for batteries and start doing your part to create a sustainable environment with just one small battery at a time!

Bollards

The Glasdon range of street bollards are the ideal solution for traffic calming schemes, sidewalks, bikeways, parking lots and other road safety applications. From flexible, impact-absorbing bollards to sign-carrying marker posts, these bollards are designed to withstand extreme weather conditions, offering a low maintenance road safety solution.

What do I need to know about Glasdon Bollards?

From flexible, impact-absorbing bollards to sign-carrying and retroreflective marker posts, the Glasdon range of bollards features a variety of styles and sizes to suit traffic calming schemes for any road safety application.

Flexible Bollards Self-Right After Impact

Self-righting, flexible bollards are an important feature within traffic calming schemes. Designed to withstand vehicle impacts before returning to their original shape.

Variety of Sign Face Options Guide the Way

To help keep vehicle drivers, pedestrians, bicyclists and other road users aware of safety precautions and regulations, we offer a wide selection of sign face options for our sign-carrier bollards.

High-Quality Materials Drive Performance

All Glasdon products are constructed using high-quality materials to ensure an excellent service life. We use a selection of rigorously tested, low maintenance materials in order to achieve optimal standards of performance.

Retroreflective Properties Enhance Visibility

For increased visibility, be it day or night, many of our bollards feature retroreflective options. Retroreflective properties such as side reflectors and reflective banding enable the bollards to be seen when dark, by reflecting the light emitted from any surrounding sources including street lamps, car headlights and bicycle lights.

Secure Fixings Keep Bollards Parked

To keep road safety bollards safely in place and provide a secure fixing, we offer surface mounted bolt-down fixings for all of our road safety bollards. Other fixing options are available.

For more information about the Glasdon range of Bollards, or for help finding the right road safety solution for you, please browse our website or contact us today.

Life Ring Cabinets

Every Glasdon Guardian™ life ring cabinet has been designed to be both highly visible and resilient whilst protecting your important life-saving equipment. Our life ring holders are ideal for any area in which large amounts of water pose a danger such as harbors, beaches, lakefronts, swimming pools and water treatment plants. You can be sure that a Glasdon life ring cabinet has been rigorously tested to provide peace of mind and provide a long service life, even in adverse weather. Don't forget you can also personalize your life ring cabinet with your organization's logo and life-saving instructions.

Guide To Personalization & Branding

Personalizing our products is a popular choice among our customers and adds that personal touch to your waste management and recycling program. It is also an effective way of communicating your waste reduction messages and enhancing your facility.

Our experienced sales team will advise you on the personalization options of your chosen product. We can also send you examples of some of our tried and tested visuals for a little inspiration.

Step 1. Choose from a wide range of products and personalization options including:

Branding, corporate color schemes, bespoke waste streams, campaign messaging and changeable poster kits.

Step 2. Selecting Standard Options

Many of our products offer standard decals and poster kits to choose from at the point of ordering. Simply select from the drop down menu the option you require on our website or contact our sales office for more information.

Step 3. Looking for Something Different?

If you would like to adapt a standard option by changing decal colors and waste streams or to include an element of branding, or perhaps you would like to create something completely unique, we can help. Our Sales team will be happy to learn more about your project and requirements. We will work with you to achieve the finish you require.

Step 4. Free Visualization Service

Our sales team will then liaise with our in-house graphics team to prepare a visual of the product with your chosen personalization, of which you're able to review and make changes to if required.

This is a free service offered to all Glasdon customers.

Step 5. Artwork Approval

We are committed to making sure the end result is exactly right for you. So when you are completely happy with the visual and have agreed any of the additional production costs, we will finalize and deliver your personalized order.

Helping you create impact, extend your brand and add value for your customers and visitors.
