

Designs for a Cleaner, Safer & More Sustainable Environment

OUTDOOR TRASH CANS

Glasdon outdoor trash cans are designed in a choice of sizes, colors and styles, providing waste management solutions that will complement any landscape. Constructed from durable materials, these trash cans are low-maintenance, and designed to resist the effects of adverse weather conditions, corrosion and vandalism.

Glasdon Jubilee™ 29G Trash Can

Glasdon Jubilee™ 29G Trash Can

Glasdon Jubilee™ 29G Trash Can

Which Glasdon Jubilee™ Trash Can is the Perfect Fit for Your Environment?

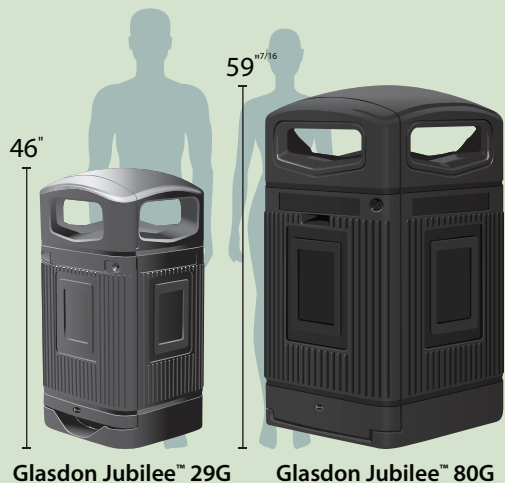

When it comes to disposing of trash, we appreciate that different locations have different needs. Whether you require a larger capacity outdoor trash can for areas with high volumes of waste, or a more streamlined option for areas where space is a little more limited, Glasdon Jubilee trash cans provide an all-round solution.

Choose from the XL Glasdon Jubilee 80G or the more compact Glasdon Jubilee 29G

If you're looking for a large- capacity, polymer waste container that has been specially designed for areas with high amounts of footfall traffic and trash hotspots, choose the Glasdon Jubilee 80G Trash Can.

If you're looking for a slightly more compact trash can, which still provides a durable, easy-to-maintain exterior alongside a traditional yet contemporary design, choose the Glasdon Jubilee 29G Trash Can.

The Glasdon Jubilee 29 Gallon Trash Can still offers all the impressive attributes of the 80G version, but on a more refined scale.

Glasdon Jubilee™ 80G Trash Can

Topsy Jubilee™ Trash Can

Community™ Trash Can

Glasdon Supplies City of Yonkers with Orbit

When it came to protecting the charm and individuality of Yonkers' many neighborhoods, the Glasdon Orbit™ trash bag holder ticked a whole lot of boxes.

A busy, metropolitan city is likely to be short on space, so a trash can that has a sleek and streamlined footprint is always going to be a winner.

The lightweight, modestly sized Orbit trash bag holder is perfect on these fronts...but don't go thinking that that this trash receptacle is style over substance.

Despite an overall weight of just 5lbs (including lid), Orbit has a variable holding capacity, dependent on bag size, and most certainly holds its own in terms of toughness and durability.

PET WASTE STATIONS

Our selection of pet waste stations is popular for use in parks, on sidewalks and in bark parks. The clear decals help to encourage people to dispose of their dog poop correctly and the contemporary design of our dog waste units means that they complement existing landscapes easily.

Retriever City™ Pet Waste Station

Retriever City Pet Waste Station

With 91% of Americans agreeing that dog parks are beneficial to their communities, it is essential to provide dog owners with the means to dispose of dog waste responsibly and hygienically. The Retriever City™ Pet Waste Station is an excellent way to help dog owners keep these well-loved areas free of dog waste.

This 9-gallon dog waste station includes an integral dog poop bag dispenser, which prevents users from taking more than one bag at a time, and a secure chute system in one complete unit. This ensures that unwanted odors will be contained, and you'll never need to worry about leaving your poop bags at home again!

Not only will this help enhance the aesthetics of your dog parks and make them more pleasant to visit, but it will also improve safety and hygiene in the area. Dog waste is toxic to grass and can be hazardous to the health of both humans and animals. This demonstrates the significance of the responsibility of identifying the most appropriate dog waste receptacle.

Available in a choice of black, anthracite gray and deep green, and with optional fixing kits and a dog leash hook accessory, Retriever City is ideal for modern urban areas, parks and bark parks.

ANIMAL-SHAPED TRASH CANS

An animal-shaped trash can is an ideal solution to help encourage young children to dispose of their trash correctly in both indoor and outdoor environments. The fun and colorful nature of the trash cans means that they are able to complement all areas for children. You can also personalize our animal-shaped trash cans to feature your company logo, color and message.

RESTAURANT TRASH CANS & FOOD WASTE RECEPTACLES

Purposely designed for the catering industry, Glasdon restaurant trash cans are ideal for fast-food diners, cafeterias, commercial kitchens and any areas where food is prepared or consumed. The easy-to-use foot pedals, tray holders and large apertures make food waste disposal effortless and hygienic.

Making a Positive Impact on Virginia Beach

Recycling Bin decorated in celebration of summit to prevent marine pollution and preserve wildlife.

The Marine Debris Summit took place on September 27 & 28th 2022 at the Virginia Aquarium & Marine Science Center, Virginia Beach. The summit focused on the prevention of consumer debris (bottles, food containers, cigarette butts, bags and other common harmful sources of litter) found in the oceans.

Virginia native Sarah Gallahan, who specializes in creating professional art murals, kicked off the Summit's celebrations by painting the façade of the Aquarium's North Building. Sarah's illustration depicts three sea turtles swimming underwater, reiterating the Aquarium's mission to protect endangered species and the marine environment. During her time with the Aquarium, she gave us the privilege of imprinting her artwork onto the Aquarium's own Glasdon Nexus 96G outdoor recycling container.

The Benefits of Battery Recycling

With technology on the rise, batteries have become a staple of everyday life. According to EPA, 2.9 billion batteries are sent to landfill in the US alone.

Batteries contain heavy metals such as lead, zinc and mercury, which are considered hazardous to the environment when improperly disposed of. That's why it's more important than ever to recycle batteries. **So, what are the benefits of recycling spent batteries?**

Reducing Waste Sent to Landfill

Despite most types of batteries being recyclable, research suggests that only 10 – 12 per cent of batteries sold annually in North America are recycled. By recycling used batteries you can help to reduce the amount of waste sent to landfill.

Preventing Pollution

Due to the heavy metal content, discharged batteries sent to landfill can corrode, releasing toxins into the air and land. These toxins can be harmful for the environment, highlighting the importance of battery recycling in order to prevent water, land and air pollution.

Conserving Natural Resources

Batteries are produced from natural resources of metal elements such as lead, lithium, nickel and other rare earth elements. Scientific research claims that recycling batteries can save a great 51.3 per cent in natural resources.

Producing New Products

Give used batteries a new lease of life by recycling them. Recycled batteries can be repurposed to create new batteries or other appliances.

Generating New Jobs

By committing to recycling you are helping to create new jobs in the recycling and manufacturing industries in the United States. Given the ability of recycling to generate jobs, responsibly recycling batteries will positively impact both the economy and the environment.

Discover our range of recycling containers for batteries and start doing your part to create a sustainable environment with just one small battery at a time!

NEW Nexus® Stack 8G Recycling Bin

CUP RECYCLING STATIONS

Increase your disposable cup recycling rate with cup recycling stations by Glasdon. We offer purpose-designed cup recycling stations to help you implement an effective and successful cup recycling program.

Eco Nexus® Cup Recycling Station

The battle with the disposable coffee cup

Our on-the-go lifestyles and passionate love for caffeine makes using disposable cups a natural behavior for us. But it's thought that the average American office worker uses 500 disposable cups each year! And with approximately 332 million people in the USA, this waste can really start to add up.

The Eco Nexus® Cup recycling station is a cost-effective, space-saving solution to cup recycling and trash collection. Combining four waste streams in one unit, it can help increase your paper cup recycling rates whilst also reducing collection costs.

CIGARETTE RECEPTACLES

Glasdon designs and produces a range of cigarette units which can be situated in outdoor smoking areas, outside buildings, in parks and on sidewalks. Within our range of cigarette waste containers, there are units that can be wall mounted as well as free standing. Having a cigarette unit mounted to a wall takes up very little space, making it perfect for narrow-footed areas. Help to reduce the cost of cleaning up cigarette butt litter for your organization by installing a cigarette ash receptacle.

WATER SAFETY RESCUE EQUIPMENT

Help keep your environment safe and well-protected with water safety equipment from Glasdon. Highly visible and resilient for a long service life, Glasdon ring buoy stations prevent theft and vandalism and are easy to position in any area where open water poses a danger. Our versatile life jacket boxes are designed and constructed with aesthetics, practicality and durability in mind to keep your vital life-saving equipment well protected.

Guardian™ Life Ring Cabinet

Guardian™ Life Ring Cabinet

Guardian™ Life Ring Cabinet

How do Glasdon Life Ring Cabinets Protect Ring Buoys?

Manufactured with tough Durapol™ polymer, Guardian life ring cabinets are designed with features that deter thieves and vandals, while protecting the life-saving equipment inside from UV rays which can degrade its material over time.

In the event of an emergency in the water, access to a life preserver ring or other PFD with an attached floating throwing line is critical. For increased visibility, Guardian life ring cabinets are available in bright red and white, or yellow and white, to create an obvious contrast in color.

Designed for USCG Approved Ring Buoys

The size of life buoy ring you require may also depend on your own industry's guidelines and regulations.

Built-in Safety and Inspection Features

To increase the speed and ease of deploying the life preserver ring and rope, the Guardian life ring cabinet incorporates our purpose-designed Ropemaster™, which allows the buoy and rope to be removed from the cabinet in one movement using only one hand. This quick release system could save valuable seconds during rescue attempts.

Easy to understand, step-by-step instructions with images show the user how to remove the ring buoy and rope quickly.

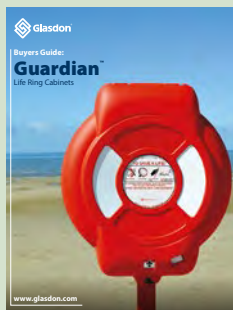

Guardian Life Ring Cabinets also feature an inspection indicator built in to aid quick and easy inspection. The white indicator appears in the window when the cabinet door has been opened.

Guardian™ Life Ring Cabinet

Guardian Short Angled Post Kit

Guardian™ Life Ring Cabinet

Guardian™ Planted in North America's Oldest Botanic Garden

Located in Southwest Philadelphia, Bartram's Garden is a 50-acre home for horticulture, the first nationally landmarked landscape and the oldest surviving botanic garden in North America. As the garden is situated beside the Schuylkill River and features a public dock where visitors can enjoy boating and fishing, adequate water safety was required.

Guardian™ Life Ring Cabinets were chosen as the perfect fit for Bartram's Garden. Guardian Life Ring Cabinets provide a highly visible and reliably durable protective station for a USCG-approved life ring or torpedo buoy. The Cabinets have been strategically placed in popular areas along the river to protect and serve guests of the gardens.

The botanic garden itself was established by the Bartram family in the 1700s, designated by a public park by the city of Philadelphia in 1891 and has been preserved ever since then by the descendants of John Bartram himself.

Today, the Garden welcomes more than 100,000 annually, sustained by dedicated volunteers, professional staff and visionary partners. Whilst it features a whole host of activities and areas to explore, they invite you to find your own path, favorite plant or place of discovery.

Nestor™ 106G Life Jacket Storage Box

Nestor™ 106G Life Jacket Storage Box

Slimline™ 42G Life Jacket Storage Box

Why choose a life jacket box from Glasdon?

Available in a slim and compact 42 gallon version or an extra-large 106 gallon option, both the Slimline™ and Nestor™ life jacket boxes make up part of the Glasdon water safety range.

Teaming eye-catching aesthetics with long-term durability

There's no denying that the striking, bright-red color of our life jacket storage containers are useful in an emergency, as they help easily locate your vital life-saving equipment, but that's not all our containers have to offer.

The Nestor™ 106G life jacket box has a uniquely designed lid which can fully rotate, enabling quick and easy access to the valuable life-saving equipment stored inside.

If space is more of a premium at your waterside environment, the Slimline™ 42G life jacket box is a great alternative. The narrow footprint of Slimline life jacket boxes allow them to be conveniently sited on narrow walkways, docks or marinas, whilst still offering a generous 42 gallon holding capacity.

Security and adding that individual touch

We appreciate that investing in a life jacket box is a serious responsibility, and the main priority is keeping your life jackets and safety equipment secure and well protected. To assist on this front, we offer the option of a lock to our life jacket storage containers, providing that extra level of security and peace of mind.

LIFE RINGS

USCG Type IV approved Glasdon life rings are an ideal buoyancy aid for use around any location where there is a drop to the water. The life rings are available in a 24" or 30" size and can be stored in the protective Guardian life ring cabinets.

GUIDE TO PERSONALIZATION & BRANDING

Personalizing our products is a popular choice among our customers and adds that personal touch to your waste management and recycling program. It is also an effective way of communicating your waste reduction messages and enhancing your facility.

Our experienced sales team will advise you on the personalization options of your chosen product. We can also send you examples of some of our tried and tested visuals for a little inspiration.

Step 1. Choose from a wide range of products and personalization options including:

Branding, corporate color schemes, bespoke waste streams, campaign messaging and changeable poster kits.

Step 2. Selecting Standard Options

Many of our products offer standard decals and poster kits to choose from at the point of ordering. Simply select the option you require from the drop-down menu on our website, or contact our sales office for more information.

Step 3. Looking for Something Different?

If you would like to adapt a standard option by changing decal colors and waste streams, include an element of branding, or create something completely unique, we can help. Our Sales team will be happy to learn more about your project and requirements. We will work with you to achieve the finish you require.

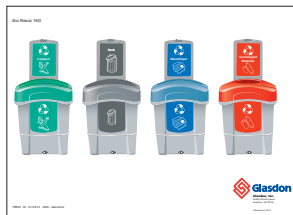

Step 4. Free Visualization Service

Our sales team will then liaise with our in-house graphics team to prepare a visual of the product with your chosen personalization, which you're able to review and make changes to if required.

This is a free service offered to all Glasdon customers.

Step 5. Artwork Approval

We are committed to making sure the end result is exactly right for you. When you are completely happy with the visual and have agreed any of the additional production costs, we will finalize and deliver your personalized order

Recycle Across America

We are proud to support the Recycle Across America campaign and have introduced the officially standardized labelling to a wide selection of our Recycling bin range.

Helping you create impact, extend your brand and add value for your customers and visitors.
