In this step-by-step guide...

- The key considerations when specifying a life ring cabinet for throwable Personal Floatation Devices (PFD).
- Links to Glasdon Life Ring Cabinets, installation and instruction leaflets and demonstration videos.
- Customer applications.

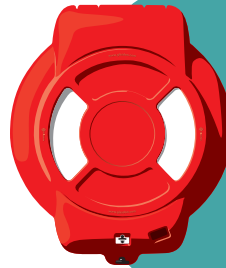

STEP 1 :

What size cabinet do you need?

Not sure what size life ring you need? [Go to Step 2](#)

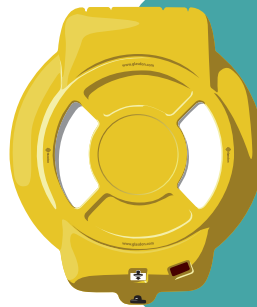

Guardian™ Life Ring Cabinets are available in two sizes to store life rings up to 30 inches in diameter or alternative throwable lifesaving devices.

Both models are designed with a universal fit to house USCG approved ring buoys and standard torpedo buoys made by different manufacturers.

Guardian 24 Life Ring Cabinet

- Ideal for 24" life ring with up to 164' (50m) of rope
- Available in red and white
- Height: 36" | Width: 30" | Depth: 10"
- Weight: 20lbs

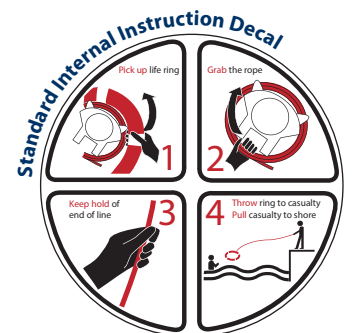

Guardian 30 Life Ring Cabinet

- Ideal for 24" or 30" life ring with up to 164' (50m) of rope
- Available in red and white or yellow and white
- Height: 42" | Width: 35" | Depth: 10"
- Weight: 23lbs

Built-in Safety and Inspection Features

- Manufactured from tough, vandal and weather resistant Durapol™ polymer
- Ropemaster™ Quick Release Rope Management System - accepts a rope up to 164' long
- Clear instruction decal
- Strong cabinet door knuckle hinge and hinge rod
- Toggle latch
- Inspection indicator
- Water seal
- Environmentally friendly - the Guardian cabinet is recyclable after its service life

STEP 2 :

Do you require a life preserver ring and rope?

If you require a USCG approved life ring, that's no problem. We can provide 24" and 30" life rings with 100' (30m) of throwing rope attached.

Not sure what size life ring you need?

- Where people work over or near water, there are Occupational Safety and Health Administration standards which may specify the size of life ring or type of throwable PFD and additional lifesaving equipment required.
- The regulations for your industry may also stipulate the length of throwing rope required and the distance between each life ring station.

Visit: <https://www.osha.gov>

USCG approved
24" life ring and rope

24" life ring weighs 3.9 lbs. Minimum buoyant force of 28lbs. Support for a single rescuer in the water. Lightweight, ideal for throwing to the rescuer in rivers, lakes and shelving beaches.

USCG approved
30" life ring and rope

30" life ring weighs 7.2lbs. Minimum buoyant force of 32lbs. Support for multiple rescues at one time. Ideal for where there is a drop to water from piers, harbors or from on board a boat.

Find out more about Glasdon life rings on our [website here](#).

Glasdon ring buoys meet SOLAS 74/83 regulations.

STEP 3 :

Where will you be locating the life ring cabinet?

Whatever your existing or new location, the Guardian™ Life Ring Cabinet is a flexible solution with rail, wall and pole mounting fixing options.

Create a life ring buoy station by attaching your cabinet to a pole. We offer Armortec™ coated steel poles which can be surface mounted or concreted-in below the ground. Our Cabinet can also be supplied with a short, angled post kit. Alternatively, it can easily fix to a locally sourced 4x4 wooden pole.

Personalized Guardian Life Ring Cabinet at the **District Wharf waterfront, Washington.**

Fixings are optional and the Guardian Life Ring Cabinet can be purchased without them.

Otherwise choose to easily mount your Guardian Life Ring Cabinet to existing walls and railings with our fixing kits.

(Easy to follow fixing instructions are available to [download here.](#))

STEP 4 :

What additional options are available?

All Guardian™ Life Ring Cabinets come with essential instruction decals inside the cabinet to assist with the quick deployment of the life ring and throwing rope.

The exterior front of the Guardian is also designed for personalization. This gives you the option to add extra decals with instructions or warnings along with your company or authority branding.

We can help you compile the messages, while our in-house team will design the artwork and send an initial visualization which is completely free of charge.

Additional Inspection and Operation Features.

- Inspection Window - easily view the contents inside without disturbing the door.
- Lid Stay – helpful when the cabinet is mounted to a pole. The lid stay securely props the lid open during inspection.
- Alarm Holder includes stainless steel bracket for fixing a theft or anti-tampering alarm to the cabinet. (Alarm not included).
